Autile2

Collagen alpha 1(II) chain precursor - mouse
C;Species: Mus musculus (house mouse)
C;Accession: A41182; A44885

R;Metsacranta, M.; Toman, D.; de Crombrugghe, B.; Vuorio, E.

A;Note: the alpha 5(IV) and alpha 6(IV) chain genes are encoded on opposite strands with C;Complex: This minor type IV collagen is thought to form a heterotrimer of two alpha 5(mong trimer amino-terminal domains (with disulfide and desmosine cross-links), dimeric a errassociations in the interrupted helical domain (with disulfide and desmosine cross-li
                                                                                                                                                                                                                                                                                                                                                                                            A, Description: minor structural component of extracellular basement membrane C, Superigation: minor structural component of extracellular basement membrane; collager alpha 1(IV) chain
C, Superiganity: collager alpha 1(IV) chain
C, Keywords: Alport syndrome; basement membrane; coiled coil; extracellular matrix; glycc
F; 27-1661/Product: collager alpha 5(IV) chain, renal splice form #status predicted <MAT1
F; 27-1264,1271-1691/Product: collager alpha 5(IV) chain, leukocyte splice form #status F; 27-1462/Region: anino-terminal nonhelical, NC2 #status predicted <NC2>
F; 42-1462/Region: interrupted helical
F; 1463-1691/Domain: collager IV carboxyl-terminal repeat <CT2>
F; 143-1573/Domain: collager IV carboxyl-terminal repeat <CT2>
F; 25,32,38,40,124,451,481,484/Disulfide bonds: interchain #status predicted
F; 25,32,38,40,124,451,481,484/Disulfide bonds: interchain #status predicted
F; 159,32,38,40,134,40,1010,1161de bonds: for 1482-1573, 1515-1570) #status predicted
F; 1592-1684,1626-1687/Disulfide bonds: (or 1592-1687, 1626-1684) #status predicted

Collagen - sea urchin (Paracentrotus lividus) (fragment)

Collagen - sea urchin (Paracentrotus lividus) (fragment)

Collagen - Secentrotus lividus (common urchin)

Collagen - Seatta, B. 2000

A) Title: Isolation of a putative collagen-like gene from the sea urchin Paracentrotus line, Biochem. A32249

A) Accession: A32249

A) Accession: A32249

A) Accession: Compared with conceptual translation

A) Molecule type: DNA

A) Residues: 1-200 csAl.

A) Cross-references: UNIPROT: Q26054; UNIPARC: UPI0000177399

C) Superfamily: collagen alpha 2(1) chain; fibrillar collagen carboxyl-terminal homology

C) Keywords: coiled coil; extracellular matrix; glycoprotein; trimer; triple helix
